

## FIGURING YOUR GRADE POINT AVERAGE WORKSHEET

Each grade has a value:

**A = 4 Points**  
**B = 3 Points**  
**C = 2 Points**  
**D = 1 point**

**USE THIS FORMULA TO CALCULATE YOUR GRADE POINT AVERAGE:**

Start by taking the number of course units; multiply that number by the number of grade points you received, and divide that total by the total number of course units.

**EXAMPLE A:** If applying to the ADN Program and wish to know if you meet the science GPA of 3.0 your figures might look like this sample:

BIOLOGY 430 - Grade B - # of units: 5	5 X 3 = 15
BIOLOGY 431 - Grade C - # of units: 5	5 X 2 = 10
BIOLOGY 440 - Grade # of units: <u>4</u>	<u>4 X 4 = 16</u>
TOTAL # OF UNITS: 14	TOTAL # OF POINTS: 41

**41 points divided by 14 units = GPA OF 2.93 → WOULD NOT qualify for application to the ADN Program**

**EXAMPLE B:** (with different grades):

BIOLOGY 430 - Grade B - # of units: 5	5 X 3 = 15
BIOLOGY 431 - Grade A - # of units: 5	5 X 4 = 20
BIOLOGY 440 - Grade C - # of units: <u>4</u>	<u>4 X 2 = 8</u>
TOTAL NUMBER OF UNITS: 14	TOTAL NUMBER OF POINTS: 43

**43 points divided by 14 units = GPA of 3.07 → WOULD qualify for application to the ADN Program**

**USE IN FIGURING YOUR OWN GPA FOR SCIENCES:**

COURSE	GRADE	# of units	FORMULA:	# of units	X grade point value	= grade points
Biology						
Biology						
Biology						
Total # of units				Total # of grade points		
TOTAL # OF GRADE POINTS _____ ÷ TOTAL # OF UNITS _____ = <b>GPA</b> _____						

**USE IN FIGURING YOUR OWN GPA FOR NON SCIENCE COURSES**

COURSE	GRADE	# of units	FORMULA:	# of units	X grade point value	= grade points
ENGWR						
PSYCH						
COMM						
SOC/ ANTH						
Total # of units				Total # of grade points		
TOTAL # OF GRADE POINTS _____ ÷ TOTAL # OF UNITS _____ = <b>GPA</b> _____
